### KEY DATA

- ☐ Reserves of around 90,000 Ounces in veins, so far, but potentially expected 500,000 Ounces
- ☐ Same expectation from the material in Stockwork: 40 Million tons of ore with 1.5 g Au / t, which would give approx 2 million potential ounces.
- ☐ In addition, there are many formal miners in the neighbourhood who can deliver their ore and we process it at the Production Plant (to be installed crushing capacity of 350 t / day)
